

The Terminal Boosts and Advertiser Richmond, directly increasing property values.

THE RICHMOND TERMINAL

Richmond's oldest newspaper; has the confidence and support of pioneers.

VOL. XXIII.

RICHMOND, CALIFORNIA, FRIDAY, SEPTEMBER 17, 1926

No. 38

San Pablo Avenue Coming Thorofare

Land Owner Donates Fine Building Sites

E. M. Tapscott, the land owner of east Richmond and also along the highway in the vicinity of Stege, is a consistent worker in development projects. Much of the improvement of the Stege and El Cerrito district is due to his substantial support and untiring efforts.

Tapscott recently donated two large parcels of land for school purposes near the new St. John's church now being completed adjoining the site of the old building. The new El Cerrito city hall and firehouse, Earl Corey's new brick garage and other improvements along the highway through El Cerrito have enhanced property values greatly the past year and assure investors substantial returns. Widening the highway is going forward rapidly and at the present rate of progress will be completed before the winter rains.

European Visitor Glad to Get Back

Steve Dettlow has returned from Europe where he has been sojourning and visiting boyhood scenes. He was the guest of a brother in Berlin, a great city of culture and music, where lager is not made by bootleggers, government inspectors strictly enforcing the law's requirements as to depth of foam and measurement of beer. But Steve says that does not account for his long stay. He would rather live in "bone dry" California any time.

Elks Charity Drive

Richmond Lodge of Elks No. 1251 is planning for the annual Christmas charity drive. Dr. A. B. Hinkley is chairman of the committee, composed of E. W. Dale, A. A. Alstrom, John Garvin, Ira Vaughn, B. F. Carter, Henry Stow, James Hoey, John A. Miller, Art Irwin, R. R. Veale, John Silva and A. H. MacKinnon.

Close Call

M. Ambrozini, 932 Stannage avenue, Albany, miraculously escaped injury Tuesday, when he was knocked down and run over by an automobile driven by W. A. McPherson, 1733 Sixty-fourth avenue, Oakland, in front of the Pullman shops. The wheels of the McPherson machine passed over Ambrozini's body but except for a minor body bruise, he received no injury.

Courthouse Badly Damaged by Fire

Mendocino county courthouse at Ukiah was partially destroyed by fire last Wednesday, the damage being estimated at \$75,000. The offices of the district attorney and superintendent of schools were badly damaged by water.

Never sleep in a room with closed doors. Lower the upper sash an inch and raise the lower sash slightly. This will give a free circulation of air without creating a draft.

Direct ferry service between San Francisco and Alameda is now in operation.

THE RICHMOND TERMINAL is the oldest newspaper in Richmond, and has hundreds of readers.

County Clerk Wells Receives People's Endorsement

County Clerk Jasper H. Wells received the top vote at the primaries August 31. Wells had no competition, and the vote of 14,670 was the highest given any candidate.

Other popular county officials received fine endorsements. Al Sullenger, county auditor, drew 13,808; Irene Hurley, recorder, 13,974; Raymond Johnson, public administrator, 13,266; Martin W. Joost, tax collector, 11,536; Chas. L. Dodge, 12,934; R. R. Veale, 10,942.

There were 19,408 votes polled in Contra Costa county at this election.

Five Absent Voters Cause Board Meet

The board of supervisors held a special meeting yesterday to canvass the absent vote at the primary election. As there were only five absent votes to canvass, the board was not detained long. But the law requires the canvass, and it must be done, even when candidates receive large majorities.

Symbol of Mohammed Adorns Egypt's Flag

The flag of the new kingdom of Egypt has a green field, the favorite color of the prophet Mohammed, with a white crescent and three white stars. The stars and crescent formed originally the symbol of the goddess Diana, who was the patroness of Byzantium, afterwards Constantinople. When the Turks captured Constantinople in 1453, they adopted this symbol as a badge of triumph and it remains a symbol in Mohammedan countries such as Egypt. The legend has it that Philip, father of Alexander the Great, tried to capture Byzantium one dark night, but the rising crescent moon revealed his soldiers to the inhabitants, who repelled the invasion. There were two famous Omars in Mohammedan history, each of whom was caliph or successor of Mohammed in the government of the Mohammedan world. Another famous Omar was the Persian poet and scholar Omar Khayyam, whose verses, the Rubaiyat, were translated by Edward Fitzgerald.

"Importing" Plants

The Leningrad institute of applied botany is organizing a series of expeditions to tropical countries for the purpose of importing the seeds of cereal plants which do not exist in the United States of Soviet Russia, but can be successfully cultivated. Professor Burasov is at present studying the cultures of potatoes, tomatoes, maize, sunflower, etc., in the western Andes of South America. Professor Voronov is at work in the Brazilian mountains, studying the types of rubber trees that can stand severe climate.—Washington Star.

Electric "Divining Rods"

Immense new deposits of ore containing gold, silver and copper have been located in northern Sweden by means of electrical prospecting devices, we are told by Dr. Axel Cavellin, chief of the geological department of the Swedish government. These electrical devices actually do what the old-fashioned "witch sticks" or "divining rods" were supposed to do. They find ore that is hidden from sight under ground.—Literary Digest.

To harden the gums and sweeten the breath rinse daily with a little tincture of Myrrh.

More School Rooms Needed; Population Increasing

Plans are being considered by the elementary school board of education to build a grammar school at 41st and Roosevelt. The site for school purposes was secured several years ago, and now that the district is rapidly increasing in population, school accommodations are necessary.

In the Shadow

Mrs. Margaret M. Burns member of a pioneer family of this region, died Tuesday at her home in Bakersfield, where she had lived for the past fifteen years. She was 45 years of age and the daughter of the late Mr. and Mrs. P. M. Neville, of Pinole.

Deceased was the wife of Frank A. Burns, of Bakersfield, and the sister of Fred M. Neville and P. M. Neville, of Richmond, and Mrs. W. B. Munsey of Fresno.

Have Attended to It?

You will be out of luck if you don't get busy and register thirty days previous to the general election, November 2.

Storks Got Their Perches

To save a 60,000-volt transmission line in Morocco from being wrecked by hordes of storks, the French company owning it has been forced to build special perches along the entire line from Casablanca to Rabat. The big birds discovered as soon as the line was built that the steel masts supporting the wires were ideally designed as supports for stork nests, giving much better foundations than a tree or a roof. The huge nests, however, interfered seriously with the insulation of the line. The special perches, and smooth shields over the masts on which the birds could not gain a footing, ended the trouble.—Popular Mechanics Magazine.

Moose Made Trouble

Linemen left Brunswick, Maine, to repair damage done to the telegraph lines when a moose contested the right of way at South Warren with locomotive No. 385 attached to a west-bound train. The moose came off second best in the joust, being tossed to the side of the track, hitting a telegraph pole, which was broken off and brought down all the wires as it fell. The moose scrambled to its feet and limped off into the woods. The train crew pursued the animal for a short distance, but it was too fast for foot, despite its injury.

Find Ancient Aqueeduct

Workmen excavating at Milford, N. H., made a curious find. At some eight feet below the surface an old wooden aqueeduct was encountered. This was found to hold fresh running water of good quality. The wooden pipe line must be at least 150 years old, as no record of such an aqueeduct is known. The line was probably laid to supply Milford's first log cabins with water.

Get Energy From Air

Windmill turbines are being perfected in Germany for obtaining a large part of its electrical energy from the air by harnessing the wind for cheap electric current. A windmill with a diameter of 45 feet has been developed to generate 21 kilowatts of electricity an hour. A wind velocity of eight miles an hour is sufficient to turn the windmill, a six-bladed device.

All Princes Barriers

English princes of the blood royal all become barriers. No examination is undertaken, the chief necessity being to dine with the benchers at the temple. The duke of York is the latest member of the royal family to be "called to the bar."

THE RICHMOND TERMINAL is the oldest newspaper in Richmond, and has hundreds of readers.

General Comment

Good Times Structure Built by Republicans

Republican senatorial and congressional candidates will win this fall, and the republican party will continue its control of the government, but it is not enough to win by a narrow margin; it is important that the victory be clear and decisive, the lead should be as near to the seven million which President Coolidge received in 1924 as is possible. Such a victory which can only be had by an organized participation by all of the people, will not only hearten those who have so far carried our country to its present state, but will dismay and discourage the democrats who for their own petty political profit would destroy the good times structure which the republicans have erected. All that is asked of the voters is that they register and vote.

Dry Democrats Have "Hopes"

The last democrat elected to the United States senate was James D. Phelan of San Francisco. That was in 1914. He received 279,156 votes, as against 254,159 for Judge Nolan, the republican candidate.

In 1920 Senator Shortridge defeated Phelan by 76,000 votes in the state. The democrats claim that Elliott, bone dry candidate for the U. S. senate, will be at least 130,000 votes stronger than Phelan, as they believe he will make inroads in Southern California on the theory that Southern California is entitled to one of the two United States senators.

Good Representative.

Through the efforts of Assemblyman Robert P. Easley during the 1925 session of the legislature he succeeded in getting through both houses the highway measure that would make the road via Antioch, Pittsburg and Walnut Creek a part of the state highway.

But the official axe subsequently took a whack at the bill, and that settled it for the time being. Mr. Easley now hopes to secure executive approval of the measure.

Easley has made a splendid record in the 1925 session, serving on a number of the most important committees of the lower house.

His strict attention to the duties of his office is emphasized by his attendance record, answering every roll call.

The democratic senatorial and congressional claims are becoming a little weaker all the time. The democrats have been in the habit of winning everything in August and gracefully losing in November; and apparently there will be no change in the situation this year. An interesting phase of the campaign which is being noted is that by reason of the democratic broad casting that republican senatorial defeats as evidence that the president is losing his hold, has only served to arouse the republicans of the country.

Reports from many parts of the west show a revival in several branches of mining, and gold in particular. Reports from lumber associations show that the demand for lumber is better than last year. While there is no boom in the oil industry, it is operating steadily and meeting a constantly growing demand. When mining, lumber and oil industries are going good, business is good all around.

Pineapple is good for indigestion, the juice containing a digestive fluid similar to pepsin.

Mexican Celebration; 116th Anniversary Observed

Pittsburg, Sept. 16.—The two days celebration here in observance of the 116th anniversary of Mexico's independence from Spain was conducted under the auspices of the Honorary Mexican Commission. Andres Moreno, commission president, was in charge of the fete, assisted by leaders of the Mexican colony, Blue Cross officials and other organizations.

Features of the program were choral singing by Mexican girls, parades and fireworks, band concerts, literary exercises, dancing, baseball and athletic sports.

Pat Mythical City

on Site of Denver

The vain lure that led Coronado and his followers into Colorado is believed to have been an old map on which was marked the city of Quivira, mythically resplendent with streets of turquoise and palaces of gold. This map indicated that Quivira was located almost on the present site of Denver, the capital of Colorado, says the Denver Post.

Almost three centuries later gold caused Denver to spring up almost overnight. When gold was found in marketable quantities near Denver in Cripple Creek canyon, the present capital city of the Silver and Gold state took root and became an important commercial and trading center.

There are cabins of prospectors for gold still standing in Colorado, and though Coronado probably was the first white man who set foot upon what Coronado's historian, Castaneda, called "Colorado of the colored rocks," Spain's hold on the American continent had been all but shaken off before Coronado boasted any "golden city."

Chemicals That Seem Really to Have Life

Making lifeless chemicals act as though they were alive is the feat reported by M. Herrera, a widely known French chemist. M. Herrera made a solution of fourteen parts of caustic soda and one part rhodamine in one hundred parts of water, and poured a few drops of this into a second solution consisting of one part olive oil and two of gasoline. The drops staged a close imitation of the behavior of amoebae, one of the simplest of animal forms. They divided, moved about slowly, elongated, formed vacuoles within themselves and constantly changed their shape. Under proper conditions they kept up this performance for as long as an hour. M. Herrera made no claim that the drops had any properties of life. The phenomenon, he said, is probably due to diffusion currents, changes in osmotic pressure, surface tension and other physical and chemical influences.

Homes for Legislators

Building at Canberra, future federal capital of Australia, is going ahead at a rapid rate, according to the Manchester Guardian. About 3,000 workmen are occupied there at present constructing government buildings and homes for housing legislators. To date \$3,000,000 have been spent and it is estimated that \$1,250,000 will be expended during the present year. When the seat of government is transferred there, late in 1927, it is expected that the present population of 4,000 will be increased to 10,000.

Keeps Up Husband's Work

Travelers by night through the forest of Senart can look up at the observatory of Juvisy where Camille Flammarion passed his nights looking through his telescopes, and still see a small red light burning at its summit, a token that his widow, after being his assistant for years, is continuing his work. She often remains at her post until dawn on nights propitious to observation and it is her ambition to finish the manuscript that Flammarion left incomplete.

Former Jim Owens Tract Changes Hands

Albany Builder Knows His Stuff

(Albany Argus) Contractor McGregor has given the junior baseball team uniforms, with the inscription on them "McGregor Builders." McGregor must be given credit for the improvements he has made in Albany, and is deserving all the advertising he can out of the baseball team, who are near professionals.

Downer - McLean

The marriage of Mrs. Edith McLean to Mr. E. M. Downer is announced.

Downer is no other than prominent banker and mayor of Pinole. Mrs. McLean is city clerk of Pinole.

The couple are on their way to New York to spend their honeymoon.

World's Cheese Output

The total world trade in cheese amounted to about 725,000,000 pounds in 1925, compared with 675,000,000 pounds in 1924. The principal suppliers of cheese on the world market are the Netherlands, New Zealand, Canada, Italy, Switzerland and France. In 1925 these countries supplied over 90 per cent of the total world exports. The countries named are not necessarily competitors for this trade, as the types of cheese produced and their supply are distinctive and consequently find their own market.

Automatic Horse

John Marcoux, an inventor, of Vancouver, B. C., has perfected and patented an automatic horse that looks like a natural equine, trots, paces or gallops, moves the neck or tail and may be harnessed to a sulky or carriage and driven with reins. The horse may also be motorized and used as an outdoor vehicle that children can handle with ease.

Indians Cheated

Peter Minuit was swindled when he paid 69 guilders, or \$24, for Manhattan island in 1626, according to the Holland society. Mr. Bergen said that \$24 in 1626 was the equivalent of \$2,000 today. He said that the 20,000-acre tract included in the sale was a barren waste, until able and full of stagnant ponds.

Exact Age of Earth

There are something like 200 different computations as to the creation date, varying from 3483 B. C. to 6084 B. C. The most remarkable calculation was that of Doctor Lightfoot, who gave the actual time of the creation of man as at 9 a. m. on October 23, 4004 B. C.

Cable Use Not Expensive

Many people have an exaggerated idea of the cost of the present-day cablegram. In 1866 it cost \$100 to send 20 words to Europe. Today a 20-word week-end cablegram can be sent to London, for instance, for from \$1 to \$1.80, depending upon the location of the sending office. And all one has to do to send a cablegram is to lift the telephone receiver and dictate the message to the operator.

Surgical Triumph

Surgeons at the Children's hospital, Iowa City, Iowa, have virtually rebuilt a child without muscles. Ray Boler, aged four, used to be merely a bunch of flesh, his arms and legs mere skin over bones without muscular control. Since birth he has been unable to stand or feed himself. Now he is able to walk and use his hands and operate a kiddie car, and his mind shows signs of brightness.

Richmond Waterfront Property Changes Owners

One of the largest real estate transactions was recorded in Martinez Wednesday for Richmond when the former Jim Owens tract, south of little Cerrito hill between 25th and 30th streets, was transferred to the Lord Realty Co. of New York. The property includes 500 lots.

The deal involves approximately \$100,000 or an average of about \$400 per lot. The deal was negotiated through the local company.

But It's a Short Dollar

Factory workers in New York City received an average of \$12.91 per week in January, 1915. January 1, 1926, they received \$30.73. According to this report wages increased 138 per cent and living costs have increased about 70 per cent. The surplus earning power buys homes, autos, radios, etc.

Portland Safe City

Portland, Ore., has just earned a great victory, by leading all the great cities of the nation in her advance made in eliminating fire hazards, in reducing fire losses and in preventing deaths by fire.

California Leads

A harvest of approximately 45,891,000 bushels of small grain is California's contribution to the nation's store of agricultural products this year. An average of one bushel for every 60 farms in the state will be used in making this vast amount of small grain available for shipment and use.

How to Get There

Yosemite national park may be reached from Fresno, Madera, Merced, Modesto, Manteca, or from the east via Tioga Pass.

El Cerrito Newlyweds

El Cerrito, Sept. 17.—The Toney Cardozas are spending three weeks in Yosemite valley, honeymooning. They were married a month ago, but deferred their trip. Mrs. Cardoza was formerly Miss Florence Guide. The Cardozas will make this city their home.

S. M. Keaton, one of the old-time merchants of Richmond, has a meat market at 12th and Barrett, where he will be pleased to serve his old friends.

CITY BRIEFS

Alpha Lodge of Masons celebrated El Cerrito night Tuesday. H. B. Hollenbaugh was chairman of the entertainment committee.

The annual Y.M.C.A. drive for \$15,000 will start Monday.

The improvement of Garrard avenue has not yet dispensed with the detour.

A towel dipped in hot water, wrung out and applied to the back of the neck will cure the severest of headaches.

Honey is effective in nearly all throat and lung infections. A teaspoonful taken every few moments will quickly allay the irritation.

Hot lemonade with sugar is excellent for biliousness and bilious headaches.

CALIFORNIA NEWS BRIEFS

Placer county fruitgrowers will hold their sixth annual convention in Auburn during October at a date to be determined within a short time.

The Boswell Gin at Corcoran, is installing \$7,500 worth of machinery to manufacture cottonseed cake, largely used by dairymen for feeding cows.

Approximately \$85,000 worth of street improvements will be started at once in San Fernando, according to action of the city council of that city.

The Petaluma chamber of commerce has decided to place an exhibit advertising Petaluma industry in the Los Angeles publicity building next year.

Preparations are being made for a three-day harvest festival to be held in Santa Rosa commencing September 22. It is planned to make this a home-coming time for all former Santa Rosans.

Work has been started on the foundation of the new building of the Chinese Methodist Episcopal church at Sacramento. The building, when completed, will represent a cost of approximately \$20,000.

Fifty dollars a ton is offered for grapes at Cloverdale, Sonoma county. Growers are holding off for what is believed to be a coming advance in prices. Grape picking will be in full blast about the middle of the month.

The Johnson Act regulating the manufacture and sale of butter substitutes and held up on the referendum, was endorsed by the Farm Bureau National Conference of District No. 3 in session at Hanford a short time ago.

Rapid progress is showing on the construction of the dams and tunnels on the \$3,000,000 project of the Feather River Power company on the North Fork of the Feather River watershed, near Meadow Valley, Plumas county.

Plans are being made to have State Engineer Paul Bailey address the citizens of Hanford and Kings county at an early date on the plan to transfer the surplus waters of the Sacramento to the San Joaquin valley for purposes of irrigation.

Grace Bull of Modesto, was elected second vice-president of the California Federation of Business and Professional Women's Clubs at the annual convention which closed in Modesto, Mrs. Margaret D. Yale of Burbank, was elected to the presidency.

The rapidly increasing popularity of Camp Sacramento, Sacramento's vacation camp in the Sierras, as a vacation place for Sacramento residents, resulted in City Manager H. C. Bottorff authorizing the construction of five additional buildings at the camp.

County Farm Advisor H. A. Weiland, Sonoma county, and Dr. E. D. Dobbis of the veterinary division of the University of California, made an investigation in the coast section to determine the nature of the malady that has caused the death of many sheep in the last few weeks.

Radio advertising of grapes grown in the El Camino district has created such a demand in Missouri, Iowa and Nebraska, that the owners of station KXPN have sent an urgent call to arrange for the shipment of two carloads a week for the balance of the season. The fruit is sold right from the car as soon as it arrives from Garber.

Plans to install a telescope at Mt. Wilson Observatory measuring 300 inches in diameter and to cost \$12,000,000 soon will be given publicity in an article by Francis G. Pease of the observatory staff, Los Angeles, to be published by the Astronomical Society of the Pacific. The present telescope lens measures 100 inches in diameter.

Fruit trees in Kern county are being seriously threatened by the red spider, according to the horticultural commission. The ravages of the spider during the present year have not been so severe locally, as during 1925 and the preceding year; nevertheless, it is important that more rigorous and effective warfare must be against it.

The board of supervisors of Napa county voted to put up to the voters of the county at the November election the proposition of a bond issue for \$100,000, to be used for the construction of memorial halls in Napa, St. Helena and Calistoga. This decision was reached after a conference with committees representing the American Legion posts of each of the above towns.

A tract of almost twelve acres of land on the University farm at Davis, is being prepared for the division of truck crops for work with sugar beets. This important crop has been subject to the depredations of the leaf hopper for the past eight or ten years with increasing destruction each year. It is the object of this division to develop, by breeding, strains of the sugar beet resistant to the leaf hopper.

Fred Hoyt, of Eureka, Calif., aviator was adjudged the winner of the "top to the Sequoia" race, having flown the 2,553 miles in twenty-one hours flying time. The announcement was made as the pick of American aviators prepared for the national air races at Model Farms Flying Field. Hoyt was given a cash prize of \$1,200 for his feat and a presented the Sequoia Centennial trophy, which will become his permanent possession. He left Eureka August 25 and landed in Philadelphia September 1, at 8 a.m. The elapsed time was 146 hours. He made one forced landing in Ohio.

An example of what thrift, hard work and good management will do to provide necessities and some comforts for a wife and family has been demonstrated by P. W. Perdue, a former resident of Texas, who came to Oakesdale, Stanislaus county, about two years ago. During the past year he has been employed by a rock company and worked his regular shift at the company plant and at odd times has planted and cared for a cotton crop of eleven acres one-half mile from the city limits. Most of Perdue's work at the plant was on night shift and after getting his sleep and rest in the mornings, a part of the day was spent in taking care of the crop. The cotton is now maturing and with the aid of two small sons he has gathered about 400 pounds and open bolls are seen all over the patch. Perdue estimates the yield at three-fourths of a bale to acre where irrigation was used.

Births, deaths and marriages in California during the first six months of the present year all show substantial increases over the corresponding period of 1925, it was announced by L. E. Ross, director of the State Bureau of Vital Statistics. Ross' official semi-annual figures disclosed the greatest percentage of increase in births, 40,503 being recorded for the first six months of 1926 as compared with 35,444 in the first half of 1925. This is a gain of 2,059 or 5.4 per cent. The semi-annual marriage figures reveal an increase of 3 per cent. The first half of this year witnessed 25,675 weddings in the state, as against 25,293 in the corresponding 1925 period. The 1926 death toll was given as 30,382, an increase of 2.2 per cent infant mortality, however, decreased 13.1 per cent.

Thirty tons of almonds per day are being received by the Arbuckle, Colusa county, warehouse of the California Almond Growers' exchange. Twelve hundred tons are expected to be handled by the association this year. This is about one-tenth of the crop figured 100 per cent increase over last year's crop. Picking to date shows the increase to be over 300 per cent increase. Prices have not been set by the almond growers' association for this year.

Sutter county has found a place for the under-sized peaches which the canneries have been rejecting. The smaller fruit promises to come into its own, according to E. E. Wernex of Yuba City, buyer for a San Francisco syrup company. Wernex this season purchased several hundred tons of the under-sized fruit for his firm, shipping the peaches to the San Francisco factory, where it was peeled, concentrated into rich syrup and sent to the trade in jars. Various varieties of the fruit are being used in the process.

The Cuyama highway was turned over to the state highway commission at a meeting of the directors of the joint district, comprising Kern, Ventura and San Luis Obispo counties, held in San Francisco, recently. The highway is between Maricopa in Kern county and Santa Maria, and under the plan it has been incorporated as part of the state highway system, and its maintenance will be in charge of the state highway department in the future.

Watermelons grown in Redlands and in the Moreno valley are now on the market and are proving to be so much better than the melons shipped in at this time that the local growers are able to secure a half-cent a pound more for their product. The Redlands cantaloupes are also bringing a better price than those from the outside. The melons grown around Montone and on the sand in the Laguna section are also of good quality.

Thirty prominent men of the state including University of California professors, members of the California Bar, and other professional and business men demonstrated their ability to earn a living by hand labor this summer, by building themselves a clubhouse of stone and timber one-half mile from the summit of the Sierras, above Truckee. The clubhouse will serve as a winter home for the California Ski Club.

First steps toward insuring a permanent, adequate water supply for Alum Rock park, municipal mountain resort seven miles west of San Jose, have been taken by the San Jose city officials with the filing of an application with the state department of public works for 500-acre feet of water a year from the north fork of the Penitencia creek, which flows through the park.

The board of trustees of the Marysville Union High School has announced that actual construction of the new union high school plant, to be erected at Knights Recreation Park under a bond issue of \$400,000, will commence December 1, and that the building will be ready for the commencement exercises next June.

What is believed by C. C. Evans, manager of the Orville Fruit and Produce Exchange, to be the first postgraduate shipment to leave California this year is on its way to Rochester, N. Y., by express. The fruit came from the Gede ranch in Thermalito.

Sixty-two of the 164 candidates who successfully passed the California Bar Examinations given by the board of examiners in the District Court of Appeals this month were graduates of the University of California College of Law.

Sacramento is practically the chief distributing point for agricultural and mining labor in California now. Such was the gist of a statement made by A. G. Anderson, manager of the state free employment bureau in Sacramento, in giving a general survey on the labor conditions in this vicinity.

TEXAS WOMAN, 66, IS GREAT-GRANDMA

And the Great-Grandpa Is Only 61 Years Old.

Fort Worth, Texas.—A great-grandmother at fifty-six. That is the distinction of Mrs. G. W. Wilson of Fort Worth. And her husband is only sixty-one.

While Mr. and Mrs. Wilson enjoy auto rides, shows, radio concerts, and can do a hard day's work in the field or house whenever necessary, there is a chubby little two-year-old girl living in a near-by county who can call them "great-grandpa" and "great-grandma."

Children, grandchildren and one great-grandchild were among those who made up the group of twenty-two persons who gathered at the Wilson home from various parts of Texas and Oklahoma for the first family reunion they have ever held, and Mr. and Mrs. Wilson were the honored hosts. Only one member of the family was absent, a son who lives in Denton county.

Wilson was only twenty and the woman who is now his wife was only fifteen when they were married forty-one years ago. Five of their nine children are married and most of these married young, Wilson said. His grand-daughter, Ruth Carson, the mother of the only great-grandchild in the family, married at fifteen.

Mrs. Wilson, was born in Dallas county and lived in this section of the state nearly all of her life. Wilson came to Texas fifty-two years ago.

"Back forty years ago Fort Worth was just a little town built up like a 'T', one stem up and down Main street and the other up and down Weatherford. I helped pave the first streets here," he said.

"This is a fast age, but I think it is a better age than the last one. We didn't used to have the conveniences that we have now. I remember one time in rainy weather it took me three days and nights to come from Dallas to Fort Worth with a wagon and team. Now, rain or shine, you can make the trip in an hour."

"We may have better doctors and better medicine now," said Mrs. Wilson, "but I believe we have more different kinds of sickness now than we had fifty years ago. Then, about all you ever heard of was chills and fever."

Find Tiger Head, Hewn by Aztecs, in Palace

Mexico City.—The most recent archaeological discovery made here is the artistic stone head of a tiger, said to have been part of the picturesque temple of Tlacotalpan, destroyed by the Spanish conquerors. The tiger head was found by workmen inside one of the walls of the national palace, where President Calles has his office. Prof. Miguel Mena, head of the archeological department of the national museum, describes the discovery as follows:

"Near the presidential door of the palace, a stone, blackened by time, stood for centuries. And only now has it been discovered. It is a beautiful and highly artistic head of a tiger. In all the priceless archeological collections at the national museum of Mexico City there is no other similar stone figure, which makes this one of the utmost importance."

"It is a daring example of primitive cubist art, which clearly shows that the Aztecs already were highly versed in the new-fangled artistic notions."

To Make Dome Center of Capitol Building

Washington.—After more than half a century of lopsided existence, improvements are to be made on the capitol to complete the structure in a manner which will bring the stately dome which towers over Washington into the center of the building where it belongs.

Millions of persons have looked at the capitol and millions have gone through it without realizing that the great dome was not in the center where it should be and that the building was unbalanced.

Senator Dale of Vermont, and Representative Montague of Virginia, are engaged on a campaign to have the necessary work authorized and appropriated for next session and they have enlisted sufficient support to get a bill passed. The work will be prosecuted with the general public building program, which calls for the expenditure of \$50,000,000 for departmental buildings.

Vienna Bachelors to Pay 65 Cents Monthly Rent

Vienna, Austria.—The socialist municipal government of Vienna has come to the rescue of bachelors. Hereafter it is declared that all single men shall be entitled to special bachelors' quarters in each of the 25,000 apartments constructed by the municipality at a rental of 65 cents a month.

Such quarters, it is stipulated, shall consist of one living room and a kitchen. Bachelors in the past were obliged to pay the same rates as a whole family.

"Yellows" Barred

Elizabeth, N. J.—City officials have issued a flat against any airborn-vehicles for public convenience. "Any color but yellow," was the reply to license seekers. The lemon color doesn't blend with the municipal scheme of harmonics, it was intimated.

CARRARA MARBLE TO MARK WAR GRAVES

Deeds of American Legions to Be Written in Stone.

Washington.—White Carrara marble is reported chosen for the permanent crosses to mark the graves of American soldiers in France.

"Civilizations stretching back to the centuries before the birth of Christ used this marble," says a bulletin of the National Geographic society from its headquarters in Washington, D. C. "Carrara marble served to honor pagan gods before the Christian Delty. As the deeds of American legions will be written in Carrara, so were the deeds of Rome's legions."

A 2,000-Year-Old Description. "It is rare that a geographical description can be used 2,000 years after it was written, but here is one of the Carrara that stands the test:

"Of these Luna is a city and harbor; it is named by the Greeks the harbor and city of Selene (modern Marina di Carrara, port of Carrara). The city is not large, but the harbor is very fine and spacious, and the sea is deep near the shore; it is, in fact, an arsenal worthy of a nation holding dominion for a long time over so vast a sea. The harbor is surrounded by lofty mountains, from whence you may view the sea and Sardinia and a great part of the coast on either side. Here are quarries of marble, both white and marked with green, so numerous and large as to furnish tablets and columns of one block; and most of the material for the fine works, both in Rome and other cities, is furnished from hence. The transport of the marble is easy, as the quarries lie near the sea."

"That was written by Strabo, Greek historian, a few years before the birth of our era. "Ships will call at the same harbor to bring away the white marble crosses for the American graves in France. The marble will come down from the lavender-tinted Carrara mountains, scalloped against a blue Italian sky, via the level course of the Strada Ferrata. "It will be cut out of quarries (there are more than 900 in the district) that probably served the Romans and the Medici and the Venetians before America was discovered. Indeed, the method of cutting marble in the quarries is supposed to have originated with Leonardo da Vinci."

"Little needs to be added to Strabo's description. The visitor first sees the great mounds of marble chips as dustlike whitewash smeared on the sides of the steep ravines. The three ravines holding most of the quarries are tributary to Carrara, a city of 25,000 quarrymen, quarrymen's wives and children, and crippled quarrymen. Carrara is dusty with dust of precious marble. It hums to the tune of 75 marble-cutting factories. The noise of chip, chip, chip is ever in the air. In Carrara even the poorest houses have chaste white-marble lintels and steps. The marble railway takes passengers free up the ravines where great white gashes memorialize marble even as marble statues later memorialize men. Somewhere a whistle blows. A pause. Then a dull explosion. Great blocks are swung out by booms to waiting wooden skids for a ride down to the railroad, and down to the sea."

Planned Mountain Memorial. "Carrara came near being the site of an enormous carving similar in concept to the Stone Mountain memorial in Georgia, which will carry the figures of Lee, Jackson, and other southern leaders. The sculptor planned a gigantic statue overlooking the sea, to be carved out of the Carrara marble mountains was Michelangelo. He may have had his inspiration from the plan of Dinocrates to fashion Mt. Athos into a gigantic figure of Alexander looking out over the Aegean sea. Neither plan was carried out."

"Michelangelo's 'David' at Florence, as well as his 'Moses' and his 'Day and Night, Evening and Dawn,' are all of Carrara marble selected 'on location,' as it were. Canova's statue of Napoleon III was carved out of a block of flawless Carrara as large as the body of the largest type of modern motor furniture van."

Pipe Buried 150 Years Still in Perfect State. Milford, N. H.—Workmen digging an excavation here made a curious find when at eight feet below the surface an ancient wooden aqueduct was encountered. This, when cut in two, was found to hold running water that poured out as fresh as any pure spring.

The wooden pipe line must have held a flowing stream of water for some 150 years, as no record of such an aqueduct is contained here, even in the early history of this village. The line of logs fitted into each other have a two-inch bore. The line was probably laid to supply Milford's first log cabins with water.

Boss Clam Eater. Providence, R. I.—Mrs. Rose Rooney of Central Falls is the champion clam eater of these parts. She ate two pecks with a fork at a bake, outdistancing by seven clams two men who ate with their fingers.

Oil from Coal. Berlin.—Some German scientists are producing oil artificially from coal, but so far gasoline is much cheaper.

NEW GAS TO RUN SUPER-ZEPPELIN

Aviation Officials Consider Employment of Hydrogen.

Washington.—Aviation officials here are following closely the experiments of German Zeppelin builders with a new gas which they plan to substitute for benzine as a fuel for their super-Zeppelin, to be constructed soon.

The new fuel, described in consular advice as carbureted hydrogen gas, is held to be superior to other liquid fuels because of increased economy and efficiency and virtual elimination of the danger of explosion.

Another advantage is that its weight is the same as that of atmosphere and, therefore, no loss of weight or balance of the airship results as the gas is consumed. Heretofore it has been necessary to equip lighter-than-air craft with compensating devices, such as the water-recovery apparatus on the Shenandoah and Los Angeles, to maintain the ship's weight as the fuel was consumed. In the absence of such devices it is necessary to valve out the lifting gas of the dirigible, a costly procedure.

One form of the new gas has been found by Zeppelin officials to function satisfactorily in the Maybach motors with which the super-Zeppelin is to be equipped. Only alteration of the carburetor is needed to adjust the motors to the new fuel.

Produced after three years of experiment by a Zeppelin physicist, Doctor Lempert, the gas, if entirely successful, is expected to change materially the construction of lighter-than-air craft, because the reduced weight of the fuel will produce a new condition of weight bearing. The gas is 700 times lighter than benzine, and one cubic meter of it develops 25 to 30 per cent more efficiency than a kilogram of benzine.

Zeppelin officials declare the new gas will reduce the strain on the framework of a ship aloft and should increase the cruising radius. The fuel is impractical for heavier-than-air craft, because planes could not carry the necessary amount of gas in several large containers.

Application has been filed for a patent on the gas in this country.

The super-Zeppelin, to be known as the LZ-127 will be similar in size to the Los Angeles, but slimmer. It will carry five Maybach motors of 420-horse power each, and will be completed late in 1927.

American Antelope Finally Saved From Destruction

Renov. Nev.—After years of effort, coupled with federal and state protection, the Nevada branch of the biological survey has announced that the American antelope has been saved from threatened extinction. The few herds in isolated parts of this state are showing a gratifying increase, and from them many animals are being sent to parks in eastern and middle western states, and to the Grand canyon of the Colorado.

Curiosity may or may not have killed the cat, as tradition says it did, but the beautiful American antelope is one of the most intriguing of animals and curiosity has almost caused its elimination. The Indian hunter hoists a colored cloth above the gray sage or sand dunes and easily shoots the inquisitive animal as it comes close to investigate the interesting lure. Sheep men of the western ranges have slaughtered thousands.

British Sunday School "Slipping" Report Says

York, England.—The British Sunday school is "slipping" because there is diminished interest in church life generally, says a report of a committee of the Methodist church conference.

Reduction of parental control and in home influence, increase in Sunday distractions and the shifting of the population, the report asserts, have seriously affected Bible study schools in this country. Rev. A. J. G. Seaton says Sunday schools have lost 20 per cent of their membership in the last 20 years. Nowadays, he added, Sunday is a day of many options. Freely it was to go to Sunday school, take a walk or do nothing at all on the Sabbath.

Hungry Chorus Girls

Atlantic City, N. J.—There are fifteen unusually hungry chorus girls here. Their show closed, the theater was locked on them and no salaries were forthcoming.

Still Going Up

Paris.—Skirts are going to be still shorter; in fact so short that nifty embroidered, beaded and laced knee caps are decreed by fashion.

Square Tree Answers Dream of Lumberman

Olympia, Wash.—Lumbermen always have regretted that there were no square trees. But now it seems that a species of cedar called guachavilla, native to Honduras, grows in this fashion. Several hundred specimens have been imported by the Washington State university for planting. This tree is said to produce lumber of the desired cross-section without the waste of slicing slabs off the round tree of the Northwest.

GIRLS OF SCHOOL AGE LEARN VALUABLE LESSON

Find Lydia E. Pinkham's Vegetable Compound a Dependable Medicine

LYDIA E. PINKHAM
ROUTE 2, CHARLESTON, ILLINOIS

From the days of the polonaise to the days of the radio, mothers have given their dependable medicine to their daughters. School girls are often careless. They get wet feet. They overstudy or they tire themselves with too many dances and parties. They get run down. Many an active girl of today, like the demure maiden of the 1870's, has found that Lydia E. Pinkham's Vegetable Compound is helping her to find better health and energy. "I gave my fifteen-year-old girl

Lydia E. Pinkham's Vegetable Compound, and it did her a wonderful lot of good. She had been out of school for four months. I read the advertisements of the Vegetable Compound, and since she has taken it she has improved and has gone back to school again. I recommend the Vegetable Compound to other mothers with girls who are not as strong as they should be."—Mrs. ALICE LOUTHAN, Route 2, Charleston, Illinois.

"My daughter was out of school two terms. I have known about Lydia E. Pinkham's Vegetable Compound all my life and finally decided that she should try it. Three bottles helped her in various ways for the next couple of years."—Mrs. W. B. GILLETTE, 986 E. 52nd Place, Los Angeles, Calif.

"I have always been sickly, and until I was fourteen my father was very strict about my perfect attendance at grammar school. I have gone to school through hard storms and often took to my bed and did not get up for eighteen months. Everyone thought I could not live. Just four months ago I began taking your wonderful medicine, Lydia E. Pinkham's Vegetable Compound, and I could notice a great change almost at once. Now I feel like a new person. I wish all girls would try Lydia E. Pinkham's wonderful medicine."—Mrs. C. M. SMITH, Union Village, Vermont.

By Weight. "She has got a lot of personality, hasn't she?" "Well, she weighs over two hundred."

Cuticura for Pimples. Faces. To remove pimples and blackheads smear them with Cuticura Ointment. Wash off in five minutes with Cuticura Soap and hot water. Once clear keep your skin clear by using them for daily toilet purposes. Don't fail to include Cuticura Talcum. Advertisement.

It is almost as risky to praise a woman's husband to her face as it is to criticize him.

Figures may not lie, but figures of speech are often misleading.

Just a Boy. First Father.—Enjoy the circus? Second Ditto.—No. The peanuts were rotten.

Claims Everyone Can Now Have Good Health

Los Angeles Business Man Suffering Months From Constipation, Indigestion and Run-Down Condition Regains Health with Tanlac

Mr. Harry Franklin, a well-known Los Angeles manufacturer with offices at 918 Broadway, says: "My experience proves that nearly everyone can now have good health. After many months of indigestion and constipation, months that ended by my being in a badly run-down condition, I regained good health, new strength and calm nerves. . . . Thanks to Tanlac. "Imagine being able to eat without suffering from tormenting pains and the burning sensation of indigestion. The poisons caused by sluggish liver and constipation ravaging my system, left me tired and draggy all the time, with no energy for my work. "Then I turned to Tanlac, determined to give it a fair trial. From the first bottle it helped me. Within a few weeks I found myself with more energy than I had known in months, a fine appetite, good digestion—I feel that I could eat nails without harm—I am so built up in every way. "I now enjoy robust health and work all day at top speed without tiring. But I have not stopped taking Tanlac, for it is the one way to continued good health, to top strength and energy. My wife, too, highly praises Tanlac. She is inclined to be delicate and has found that Tanlac

has preserved her health and strength for many years. Everyone should take this wonderful tonic. "Tanlac has helped thousands of Californians. It is Nature's own remedy made from roots, bark and herbs according to the famous Tanlac formula. The first bottle usually brings wonderful relief from pain. Keep up the treatment and you grow stronger, healthier, more robust. "Don't neglect your health, don't suffer from pain needlessly, begin taking this wonder tonic now. Ask your druggist for Tanlac—today!"

To be both popular and respectable at the same time is about as far as any man can go.

Think twice as much as you study, and you will have the proportions about right.

CHILDREN CRY FOR
Fletcher's
CASTORIA
MOTHER—Fletcher's Castoria is a pleasant, harmless Substitute for Castor Oil, Purgative, Teething Drops and Soothing Syrup, especially prepared for Infants in arms and Children all ages.
To avoid imitations, always look for the signature of *Dr. H. C. Fletcher*.
Proven directions on each package. Physicians everywhere recommend it.

FACIAL ERUPTIONS
Resinol
Resinol is a powerful and effective remedy for all facial eruptions, including pimples, blackheads, and acne. It is a pure vegetable preparation and is perfectly safe for use on the face.

PETALUMA HATCHERY
Established 1901 by L. W. Clark—Foster since 1911. White Leghorns only, the large, heavy, lay egg. This hatchery is located by the Sonoma County Fair Grounds, which guarantees the purity of the stock. Write for Free Catalog and Price Book. The profit from Fall chicks might surprise you. L. W. CLARK, BOX 155, PETALUMA, CALIF.

Boy Strangled in Game of "Hangman"

Derby, Kan.—The game of hangman cost Newton Snyder, sixteen years old, his life here. With other lads, the youth had fastened a rope to a rafter in the basement of his home. First one and then another of the boys placed the rope about his neck and jumped from a box without being injured. Snyder then arranged the noose for his own neck and leaped. The noose tightened with a jerk and he was strangled to death before he could be released.

KILLED OWN BABY AS TEST OF FAITH

Leader of Spanish Religious Cult Beheads Child.

Santander, Spain.—While members of his religious cult knelt in prayer in a circle about him, Malo Lopez killed his twenty-month-old son with an ax. Lifting the head of the child into the air, Lopez asserted he had killed the baby "at the command of God" to test his faith. A passing soldier, attracted by the gathering, called help, and more than two dozen men and women were arrested.

Lopez recently founded a strange religious cult whose members make a habit of fasting and beating one another with wooden rods as tests of faith. Lopez always remained foodless longer and suffered more blows than did any of his followers. The man is believed to have devised the sacrifice of his infant son as demonstration of his supreme faith and the right to be leader of the cult. Despite the protests of his wife, he invited all his followers to attend the ceremony.

Lopez killed the baby with one blow of the ax. The father, who authorities assert is sane, is held for murder, as is his wife and a priest of the sect. The other prisoners are charged with being accessories to the slaying of the little victim.

Demented Son Slays

Mother With Torture

Springfield, Mass.—Richard C. Bearse, twenty-six, mechanical engineer, slew his mother by torturous mutilations that left him apparently insane. He was found talking incoherently and sitting beside the body of his parent, with whom he had lived alone for fourteen years.

Bearse, who was a university graduate, had not previously shown signs of mental aberration. Whether he became enraged at his mother over a personal affair or was mentally unbalanced through worry over his parent's health is not known. A neighbor, hearing screams from the Bearse house, called the police. The police broke in. Bearse sat on the kitchen floor beside the body of his mother.

"She died twice in the night and I revived her once," he said. Mrs. Bearse, fifty-five, married Fred S. Bearse, Hampden county treasurer, in 1891. In 1912 she obtained a divorce. Her husband continued to contribute to her support. Alienists who examined Bearse declared him insane, and he was committed to an asylum for an indefinite period.

Back Broken, Walked

for Week With Cane

Buffalo, N. Y.—After Edward Douglas Howard of Chicago, a junior at Williams college, had hobbled about with a cane for more than a week, physicians here discovered that he had a broken back. He was strapped into a specially made apparatus and taken to his father's summer home at Chautauqua to recuperate. Physicians said he would be able to play football in the fall of 1927.

Howard was injured more than a month ago when he dived into the shallow end of a pool at Williams and struck his head on the bottom. A short time later, while delirious, he leaped from the third story of the infirmary. He recovered sufficiently to come to Buffalo alone, where an X-ray examination revealed the broken vertebra.

Cut to Pieces When

Caught in Machinery

Sturgeon Bay, Ont.—Caught in the gear of the rewinder in the paper mill of the Spanish River Pulp and Paper company, William Roy Smith, eighteen-year-old swimmer, met a horrible death, being literally cut to pieces by the heavy machinery. The youth was employed in the finishing room of the paper mill, and had just completed spinning the roll on the calendar of the machine. With a fellow-worker, the unfortunate youth was ready to go to another part of the mill, when, it is believed, he backed into the heavy gear of the rewinder. The body was cut to pieces before the machinery stopped. The accident took but the fraction of a minute.

First Fishing Rod Kills

Milton, Pa.—Happy with his first fishing rod, Charles Sewall, aged twelve, went fishing in the Susquehanna near here. He had a bite and raised his rod with a swift, having visions of a big fish. Overhead the tip of the rod touched a 2,500-volt electric wire and the lad was electrocuted.

The KITCHEN CABINET

(By 1926, Western Newspaper Union.)

Let the one who alights for comfort
Feel a handclasp true;
It will cheer the way, and surely
Can't impoverish you.

Lives are human, though so often
We disguise our pain.
Some are hungering for your comfort;
Give and give again.

WORTHWHILE GOOD THINGS

Here is a good pudding and one that is not extensively known.

Banana Pudding.—Take a quart of water, a pint of milk, and two eggs yolk. Make alternate layers of the nuts, wafers and cream filling, adding six bananas and a can of crushed pineapple. Serve with thick whipped cream.

Velvet Sponge Cake.—Beat four eggs very light; add two cups of sugar and beat for twenty minutes, adding the sugar gradually. Then add one cup of boiling hot milk, one teaspoonful of lemon or vanilla and two cups of flour sifted with two teaspoonsful of baking powder folded into the egg mixture. Bake twenty to thirty minutes. Spread with the favorite filling or frosting.

Date Pudding.—Mix one pound of walnuts (measured in shell), one-half pound of dates stoned and chopped, one and one-half cups of sugar, one cup of crushed and rolled bread crumbs, two teaspoonsful of baking powder and six eggs, yolks and whites beaten separately. Add the dry ingredients, then the yolks and fold in the stiffly beaten whites. Bake in a sheet and serve with whipped cream spread over the top.

Asparagus With Cheese.—Take one can of asparagus, six hard cooked eggs, one-fourth cupful each of butter and of flour, one cupful of milk and one-half pound of cream cheese. Make a white sauce of butter, flour and milk. Place a layer of the asparagus in a baking dish, cover with the cheese and white sauce, then another layer of asparagus and finish with the white sauce and cover with buttered crumbs. Bake about twenty minutes. Season well to taste with salt, paprika and pepper.

Pickled Peach Sherbet.—Prepare a lemon sherbet, using one pint of water, one-half cupful of sugar, one teaspoonful of gelatin, one-fourth cupful of mashed pickled peaches, and the juice of a lemon. See that the gelatin is well dissolved and the mixture well blended; turn into the freezer and freeze. This is unusual and especially delicious.

Seasonable Dishes.
A good salad which may be prepared at almost any season of the year is:

Banana and Green Pepper Salad.—Remove the skin and veins from three bananas and slice, add half a cupful of finely diced tender celery, one handful of blanched almonds shredded and mayonnaise to moisten. Serve on lettuce.

A nice luncheon dish when it is hard to think of anything new is:

Golden Duck.—Prepare a plain white rabbit as follows: Combine three tablespoonsful of flour, one tablespoonful of butter, one teaspoonful of salt, one-fourth teaspoonful of paprika, an egg, and two cups of cheese put through the food chopper. Add two cups of milk and cook over the hot water, stirring frequently until thick. Serve on large slices of buttered toast with a poached egg on top of each.

Cherry Cake.—Bake a sponge cake in a sheet pan and when cold spread with the following mixture made from either fresh or canned cherries: Put a quart of fresh cherries, add two cups of sugar and let stand a while, then boil fifteen minutes. Drain the juice and when cool add a cupful of cherry juice and a cupful of water and boil, pour over two tablespoonsful of gelatin dissolved in one-fourth of a cupful of cold cherry juice. Stir in the pulp and when thick spread over the cake. Top with whipped cream sweetened and flavored with almond.

Green Corn Pudding.—Take twelve good-sized ears of corn, slice off half the kernels with a sharp knife and with blunt edge scrape out the milky germs that remain, leaving the husk on the cob. Add a tablespoonful of butter, salt and pepper and three-fourths of a cupful of milk. Bake with dots of butter over the top. Bake forty-five minutes.

Cucumber Sauce for Fish.—Grate two small cucumbers and cook in two tablespoonsful of butter closely covered; stir frequently; when well cooked add a half pint of rich white sauce, season with lemon juice, salt and pepper, adding a bit of spinach juice for coloring.

When food has cooked on the pan and scorched, remove and cool by setting at once into cold water; the steam carries away the scorched taste, if not too badly scorched.

Neenie Maxwell

AROUND THE HOME

By MARGARET BRUCE

A Good Listener

It has often been said that a woman (or a man either, for that matter) does not need to be a good talker if she or he is a good listener. A woman frequently gains the reputation of being charming solely because she knows how to listen sympathetically and with interest to what others are telling her.

This isn't hard to do when one is out among persons whom one knows more or less well. Courtesy compels a certain amount of real or apparent attention to the remarks of one's dinner companion, and many a discerning woman has discovered that the way to attract a man is not to impress him with cleverness but to let him impress her with his! The better one knows a friend, however, the harder it becomes to listen patiently and attentively, if one is not specially interested.

Hardest of all is it to be a good listener in one's own family. When the man of the house starts on a long harangue about the office and the men working in it, with details about his opponents in the field of competition, it takes every ounce of concentration his wife can muster to keep her mind on what he is saying, not to let her thoughts meander off to her own affairs, and to put in an occasional interested question.

Yet these very matters are the foremost things in his life and reviewing them for her sympathetic ear often helps him to think out the way of solving a difficulty, or aids in getting resentment out of his system. If he will stop and think how equally difficult it must be for him to listen patiently to her tales of inefficient servants, the doings of neighbors, or the details of household management, it will help her to be the good listener that every homemaker must learn to become.

To listen attentively to the long-winded stories the children bring in, to follow their development by listening to their confidences and encouraging them, is not only to be a good mother but to be as courteous and thoughtful as she expects the children to be in turn.

Our Comfortable Clothes

We women ought to be very grateful, it seems to me, for the increased comfort of our clothes as compared with the fashions of the past. The March magazines of a generation or two ago bristled with illustrations of pretty girls being driven along before a brisk wind like a boat under full sail, their wide skirts blown over their heads and their petticoats, many in number, resembling the myriad petals of a huge rose! Nowadays the snug young woman in her straight, narrow sport coat or fur jacket and slim skirt, cleaves the stiffest gale without so much as the flutter of a hem.

It has interested me to see how persistently woman has rejected attempted styles that made her uncomfortable or hampered her movements. Probably our growing love of athletics, outdoor life, and greater physical activity have been the cause of this demand for freedom in dress. Long trains that swept the ground, corsets that bound the waist, layers upon layers of underclothes, are not to the taste of the woman who likes to take a brisk walk, play tennis or golf, and dance with the abandon of a young nymph.

When, early this last winter, long skirts made their appearance, with panniers that dipped to the very dust (and accumulated it), and the era of street-sweeping seemed about to return, some women friends and I made

a prediction that this fashion would never see the season out. And it hasn't! Skirts are a little longer than last year, to be sure, but the ultra-long ones have been barred, and they have now settled upon that stage of comfort and grace combined that was not found in either the extremely short or the excessively long ones. Small, close-fitting hats for winter are another of the comforts which women have made popular. Hats? Never! Broad-brimmed picture hats to catch the vagrant gusts—not at all! In summer the wide shade hat may be comfortable, to shut out the sun, but don't try to force them on us in winter.

The manufacturers are growing wise. They know that when an uncomfortable style is introduced, only a few silly young girls will adopt it.

Toothache Rheumatism
Neuralgia Pain, Pain

Each unbroken "Bayer" package contains proven directions. Handy boxes of twelve tablets cost few cents. Drug-gists also sell bottles of 24 and 100.

Mainsprings Susceptible

The mainsprings of his watch having longer refused to function early in the week, he took it to a local jeweler to whom he ventured the suggestion that a new high-grade time-piece ought to last more than a few months—it was a Christmas gift—without needing repair.

"I was surprised when the expert repair man told me more mainsprings broke during the heated season than at any other time during the year. Thunderstorms and rapid changes wreak havoc with them. It was a new one on me. We learn something every day," he confides.—Brooklyn Enterprise.

Likes His Old Bus

"I see the French are expected to make a coup d'etat."
"Maybe so, but the ol' flivver is good enough for me."

Decapitation Adds to Insects' Lives

At a recent session of the Academy of Science Professor Bouvier read a curious paper written by R. E. Cambout, noted entomologist, and for many years a missionary in Madagascar. The purport of the paper was to the effect that the lives of butterflies could be prolonged by cutting their heads off in such a way as to avoid a hemorrhage—an operation which, it would appear, can be performed by an expert.

Cambout declares that he has tried the experiment successfully with eighty butterflies and that his patients—if that is the word—not only retained "all their faculties and were able to reproduce their species, but the average span of their lives in every case was prolonged by from one to two weeks."

Decapitation as a means of prolonging life! What do the many clients of Monsieur Deibler (the guillotine) think of this?—From Le Petit Parisien. (Translated for the Kansas City Star.)

To Study Earthquakes

Two laboratories for the scientific investigation of earthquakes are in process of erection. One is being built at Imperial university, Tokyo, Japan, and the other is being constructed at Pasadena, Calif., by the Carnegie Institution of Washington.

FISHER BODIES

THE INEVITABLE BODY ON THE QUALITY CARS

There could be no greater proof of Fisher quality than the selection of Bodies by Fisher for all of the leading makes of cars, in all price divisions.

Fisher Bodies have been exclusively adopted for all divisions of the General Motors Corporation, for instance.

And whether your selection be Cadillac, Buick, Chevrolet, Oakland, Oldsmobile or Pontiac, on every General Motors car you find a body with all of the inbuilt factors of safety, comfort and convenience which have

made a Body by Fisher the standard of highest quality the world over.

New products of General Motors have just been announced. As you consider their greater merits we ask you to give particular attention to their exclusive use of Bodies by Fisher.

The latest Fisher creations set the new General Motors cars as far ahead in safety, comfort, beauty and convenience as any mechanical improvements could possibly do.

Heroic in Suffering
At the annual class play of the Stockton (Calif.) high school, Mary Eta Figge went ahead with her performance, even though an emergency operation for appendicitis, had been advised by her physician who stood in the wings to encase her in ice packs during those moments she was not on the stage. The minute the performance was over she was placed in an ambulance and taken to the hospital, where surgeons were waiting to perform the operation. It was successful.

NOT THE RIGHT KIND

South American Fly

Laughs at Distance
After studying the flight of birds for centuries, man at last has learned to fly; and in doing so he has outdistanced his living models in speed, in altitude and in carrying ability.

Now a study of the marvelous flying mechanism of the world's speediest known creature, a South American fly known as Cephemymia, has led at least one scientist to suggest the possibility that eventually birdmen may nearly triple the present airplane speed record of 300 miles an hour, says Popular Science Monthly.

Dr. Charles H. T. Townsend, American entomologist stationed at Itaquecetube, Brazil, points out that if we can learn to duplicate the action of the Cephemymia we shall be able to fly around the earth between sunrise and sunset of the longest summer day, or in about seventeen hours. To do this over the 13,855-mile circuit at the latitude of New York, we should have to travel constantly at a speed of 815 miles an hour, or about 14 miles a minute! This is as fast as the speed of projectiles of certain types of artillery.

The fact remains that Cephemymia does cover 815 miles an hour, or nearly 400 yards a second. With tremendous power stored in a body of extremely light weight, it moves so swiftly that it can be seen only as a blur or streak of color.

He—Didn't know I could lift you, did you?
She—No, but daddy wants me to get a hubby who can lift the mortgage on the old home.

Forewarned

Charles Lane, screen actor, discussed at a dinner a recent slump in the stock market.

"These things are often psychological," he said. "They happen, I mean, without any real rhyme or reason. They are born of nightmare fears."

"The stage manager of a music hall rushed to the proprietor one night and said:

"Turn Nine refuses to go on with her trained mice. She says she's been reading that newspaper story about the young politician who was devoured by lions in Bechuanaland."

Caribou Now Extinct

The caribou which once roamed Minnesota forests in vast numbers have been driven from the state and not a trace of the animals has been found this year, according to a report to Governor Christianson by Albin S. Pock, United States district forester.

Superior national forest, until this year, was the habitat of a small herd of caribou and others roamed at large but not one report of the animals has been received this spring and summer.

Mexican Labor a Menace

There may be grounds for debate for and against the immigration law which bars the low priced labor of Europe from America. But there can be no debate on the question that it is time definite steps were taken to control, if not restrict, the flood of peon Mexican immigration into this country. Between seventy and eighty thousand Mexican peons are entering the United States annually. They enter with work permits and with agreements and obligations to return to Mexico at certain and stated periods. As an actual fact, the great mass of these people simply hide away and remain here indefinitely.

The fact that these men can be secured at a wage, in some cases, not more than one fourth of what our native workmen require, makes them particularly a subject for exploitation by the industrial concerns.

There are certain forms of low agricultural labor for which native workmen cannot be secured, and where these men fill a need, and the immediate daunting of this labor might bring disaster to innocent people, it cannot be ignored however, that after a short stay in this agricultural area these same men work into the industrial field where the competition with our own workmen becomes actual and serious.

Congress will do well at this next session to give immediate consideration to the curtailment of this flood and to the regulation of this type of immigration.

American Standard the Best

Let us look at the facts frankly. It is not merely by luck or accident that while six million unemployed are roaming through Europe, the American workman is finding daily employment. It is not merely luck or accident that while European movies have a daily fluctuating value, so that distress stalks everywhere, here in America we are able to show a continuance of the American standard of living and of the American wage scale. It is not mere luck and accident which gives us the American spirit as a whole in contrast to the multi-political divisions of Europe. Back of the American progress stands the republican administration and the character of the president and the confidence which the people have in him.

The country newspaper is the nucleus of community life, and the country must measure its progress by the community. The country editor exerts more of an influence on the community than any other agency. He is the advance agent of its civic progress, the stimulus of its social life, the big brother of the church, the patron of the school.—M. Thorpe

The Courageous Suitor

"I'm going to town to call Heck Tarpy by telephone," said a youthful swain of the Torpidity neighborhood.

"Why—great ginny!—what are you going to do that for?" asked an acquaintance. "His house is right over there, and all you have got to do is stop at the gate and holler for him to come out."

"That's just what I don't aim to have him do till I find how I stand with him. I'm going to tell him I want to marry his daughter, Gloriosa, and I want him to be well out of reach when I do so. Then if he turns me down I'll drink a few horns of moonshine licker and go over and sass him all I want to."—Kansas City Star.

Queen Well Knew Way to Hearts of Italians

"Margherita, the late dowager queen of Italy, and Eleanora Duse were two of the greatest women Europe has produced since the Renaissance," said some one who has studied Italian life for half a century. Each was supreme in her way and each practiced that greatest of all arts—simplicity.

An incident which had occurred years ago when Margherita was the young and beloved queen of Italy, still is related. She was riding through the gardens of the Borgese one afternoon in her splendid carriage with eight outriders—in scarlet and gold, when she saw a ragged and crippled child standing at the side of the road. Instantly she stopped the carriage, and breaking the string of her magnificent pearls, gave one of them to him and drove on.

Now that's the kind of gesture which the people love. No one who saw that incident would ever stop to think that she might have done an equal amount of good in a less picturesque way. All people—especially Latins—respond to that kind of thing.—Mande Parker Child, in the Saturday Evening Post.

Chinese Kitchen God Deity of Importance

The Chinese have a festival of some kind almost every month. One of the most important, says China, is that of the kitchen god, which takes place on the twenty-third day of the twelfth month of the year. Then all the family congregate in the kitchen to do honor to the kitchen god, whose image is pasted on the chimney, for that night he is supposed to go to heaven to report on the conduct of the members of the household during the last year.

To show that he must report only their sweetness, the head of the family smears the lips of the image with molasses! After this they burn the image with great ceremony, and it is believed that the god ascends with the smoke.

A week later the family again assemble to welcome his return. Amid great rejoicing and the popping of many firecrackers they put up a new image.

Most Important

The baby was the sensation of the neighborhood and all the children for blocks around came to view it. Among them was little Philip, whose interest, to tell the truth, centered not so much in the baby as in the multitude of pins, rings and lockets with which it was surrounded.

Philip examined all these gifts carefully, and finally, turning to the proud mother, asked: "Did all these decorations come with it?"

NOTICE OF ADMINISTRATRIX'S SALE OF REAL ESTATE AT PRIVATE SALE

In the Superior Court of the State of California in and for the County of Contra Costa, No. 8855.

In the matter of the estate of B. H. Griffin, deceased.

Notice is hereby given that the undersigned administratrix of the estate of B. H. Griffin, deceased, will sell at private sale to the highest bidder for cash, lawful money of the United States, and subject to confirmation by the above entitled Superior Court on or after Saturday, the 18th day of September, 1926, all of the right, title, interest and estate of B. H. Griffin, deceased, and all of the right, title and interest that said estate has by operation of law or otherwise acquired, other than or in addition to that which the said B. H. Griffin had at the time of his death, of, in and to that certain real property, situate, lying and being in the county of Contra Costa, State of California, and more particularly described as follows, to-wit:

Lots 1, 5, 6, 7, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33 and 36 in block 9 as said lots and block are laid down and delineated on that certain map entitled "Walls Harbor Center Tract," City of Richmond, Contra Costa County, California, surveyed and delineated by P. A. Hawland, C. E., February, 1913, filed the 31 day of March, 1913, in the office of the County Recorder of Contra Costa County, California.

Together with all the improvements thereon and appurtenances thereto belonging.

Terms and conditions of sale: Cash, lawful money of the United States, ten (10 per cent) of bid to be paid at the time of sale, balance on confirmation of said sale by said Superior Court and upon delivery of administratrix's deed.

Bids or offer in writing may be made at any time after the first publication of this notice and before the sale and may be delivered to the administratrix at the office of her attorney, C. D. Horner, 629 Macdonald Avenue, Richmond, California, or may be filed in the office of the Clerk of the Superior Court of the State of California, in and for the County of Contra Costa at the courthouse in the city of Martinez, said county and State. Dated this 24 day of September, 1926.

LILLIAN S. GRIFFINS, Administratrix of the Estate of B. H. Griffin, deceased. 25-10-17

LEGAL NOTICES

NOTICE OF TRUSTEES' SALE OF REAL PROPERTY

WHEREAS, on the 1st day of December, 1923, Manuel Grace and Florence Grace, husband and wife, did make, execute and deliver to John Regello and Ivan Conn as Trustees for the benefit of Maria L. Andrade, all parties being of the County of Contra Costa, State of California, a certain Deed of Trust as security for a certain promissory note dated the 1st day of December, 1923, for the sum of One Thousand (\$1000) Dollars together with interests, costs, etc., which might grow due thereon, which deed of trust was recorded on the 7th day of December, 1923 in Vol. 447 of Deeds at Page 193 thereof in the office of the County Recorder of the County of Contra Costa, State of California, and

Whereas, default has been made in the payment of the principal and interest due on said note and said trustees and the said beneficiary did on the 29th day of April, 1925, record in the office of the County Recorder of the County of Contra Costa, State of California, in Vol. 26 of Official Records at Page 430 their Notice of Breach and Intention to Sell Under Deed of Trust in pursuance to a written demand made on the undersigned, John Regello and Ivan Conn, as trustees under said deed of trust that they sell the real property described in said deed of trust and hereinafter described to satisfy said indebtedness;

Now Therefore, in pursuance of said demand and in accordance with the power and authority conferred upon them by said deed of trust the said John Regello and Ivan Conn do hereby give notice that on Saturday the 11th day of September, 1926, at Eleven (11) o'clock in the forenoon of said day at the front door and street entrance of the Justice's Court of the Fifteenth Township, County of Contra Costa, State of California, to-wit, 707 Macdonald Avenue, City of Richmond, County of Contra Costa, State of California, they will offer for sale and sell at public auction to the highest and best bidder, for cash, lawful money of the United States, all that certain real property situate, lying and being in the County of Contra Costa, State of California, and particularly described as:

Being Lot 15 in Block 10, as designated on the map entitled "Bancroft Subdivisions, San Pablo, near Richmond, Contra Costa County, California," which map was filed in the office of the County Recorder of said Contra Costa County, State of California, in January 17th, 1906, in Volume "B" of Maps at Page 126.

Together with all and singular the tenements, hereditaments and appurtenances thereto belonging or in any way appertaining and the reversion and reversions, remainder and remainders, rents, issues and profits thereof.

Terms of Sale: Cash, lawful money of the United States, ten (10) per cent payable to the undersigned at the fall of the hammer, balance payable within three (3) days thereafter and upon delivery of Trustees' deed, and if not so paid the ten per cent to be forfeited and the sale to be void, costs of sale at purchaser's expense.

Dated this 19th day of August, 1926.

JOHN REGELLO, IVAN CONN, Trustees.

C. D. Horner, Atty for Trustees.
